SPARKY

The pedigree chart is a tree structure starting from a single individual labeled 'SPARKY' on the left. A horizontal line extends from 'SPARKY' to a vertical line. From this vertical line, two diagonal lines branch out to the right, meeting a horizontal line. This horizontal line then branches into two more diagonal lines, which meet another horizontal line. This pattern repeats, creating a total of four levels of branching. Each level consists of a horizontal line that branches into two diagonal lines, which then meet another horizontal line. The final level consists of four horizontal lines, representing the offspring of the third level.
