```

The pedigree chart for FC Adirondack Antoinette shows a lineage starting with Fish Creek Skippy. Skippy is mated to an unknown male (represented by a blank line), resulting in two daughters. The top daughter is mated to an unknown male, resulting in two daughters. The bottom daughter is mated to an unknown male, resulting in two daughters. This pattern continues for three more generations, with each individual in a generation being mated to an unknown male and producing two daughters in the next generation. The chart is a standard pedigree format with horizontal lines for males and vertical lines for females, connected by diagonal lines representing mating and offspring.
