

The image shows a blank template for a dichotomous key. It features two main branching paths on the left side, each leading to four terminal lines on the right side. The background is a light blue color with a repeating geometric pattern of small squares and lines. The branching paths are represented by black lines that split and then merge back into a single line, creating a series of nested, horizontal, hourglass-like shapes. The terminal lines are horizontal and extend to the right edge of the page. The overall layout is clean and professional, suitable for educational or scientific use.
