A blank template for a phylogenetic tree. The tree is rooted on the left side with a single horizontal line. From this root, two main branches emerge, each leading to a series of smaller branches. The top main branch splits into two sub-branches, each of which further splits into two more sub-branches, resulting in a total of eight tips. The bottom main branch also splits into two sub-branches, each of which further splits into two more sub-branches, resulting in a total of eight tips. The branches are represented by thin black lines, and the tips are represented by short horizontal segments on the right side of the diagram.
