

[illegible]

Labrador Retriever
Female

A blank template for a phylogenetic tree. The tree starts with a root node on the left labeled "Grady". From this root, a horizontal line extends to the right, then splits into two diagonal lines. Each of these diagonal lines leads to a horizontal line, which then splits again into two diagonal lines. This pattern continues, resulting in a total of 16 empty terminal nodes on the right side of the diagram, arranged in four groups of four. The background is a light blue grid.
