

PEDIGREE

STANFORD'S SILVER STAR

English Pointer
Female

The pedigree chart is a horizontal tree diagram. It begins with a single line on the left, which branches into two lines. These two lines each branch into two more lines, creating a total of four lines in the second generation. Each of these four lines then branches into two lines, resulting in eight lines in the third generation. Finally, each of these eight lines branches into two lines, creating a total of sixteen lines in the fourth generation. The lines are arranged in a symmetrical, branching pattern, typical of pedigree charts. The background of the chart area is a light blue, repeating pattern of the words 'English Pointer' and 'Female'.
